

[2] a
(1963)

For other poems see
[23] p11 + [24]

A'', a mathematical construct;

in 1968 termed: "Conceptual Space"

Re Conceptual space: In (4) see
pp 265-7, & Note 1,2, p 277

Expanding A''

Each welcomes from the womb his world expanding
Sights, and sounds, and tastes, unknown yet known.
Fill voids felt within the living tomb.
One horizon reached, reveals another
From which we ever outward grasp
Spirit freeing from myopic mazes.
Against this cauldron surface boiling
Gestalts in forming lose their being,
Giving forth in measure to receiving.
Each outward loss brings inner gain,
Maintaining surface interfaces, interchanging
Worlds that were, with are, with yet to be.

See [4] a p429
+ pp 424-436 Concluding
Remarks

+ pp 275-277

Contracting A''

That which might be, rarely is.
Clouds descend upon the senses
Hiding what might from ~~the~~ ever being.
Shrouded, pressing ever inward
Our little known becomes the only,
Cold, and slow, but crystal clear
The present day is but a yesteryear.
Its hard smooth surface passes by
And near, as far, no gains or losses.
An artifact of time; frozen, still;
Passed by time and life and love.

See [5] pp 271-274
The Cheshire Cat route to
the Beautiful One autism.
